### EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Henry Coleman on July 18, 2005.

The application has been amended as follows:

Please cancel claims 24-47

EA

The following is an examiner's statement of reasons for allowance:

The rejection of claims 1, 6, 9-13, 15-17, 48, 50, 51, and 53-57 under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No: 5583010 in view of U.S. Patent No: 5639603 is withdrawn in view of the Board of Patent Appeals and Interferences decision (Appeal No. 2004-1728), particularly that the combination of Baumbach and Dowry do not suggest analyzing receptor interactions in real-time as required by the instant claims as Dower's wash step illustrates that the receptor-ligand binding step is separated in time from the analysis step, see the last paragraph of page 6 following to page 7 of Appeal No. 2004-1728.

The rejection of claims 2, 3-5 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No: 5583010, in view of U.S. Patent No: 5639603 as applied to

Art Unit: 1649

claims 1, 6, 9-13, 15-17, 48, 50, 51, and 53-57 above, and in further view of Robeva, AS *et al.*, *Drug Development Research* 39(243-252)1996 is withdrawn in view of the Board of Patent Appeals and Interferences decision (Appeal No. 2004-1728), that the combination of Baumbach and Dowry do not suggest analyzing receptor interactions in real-time as required by the instant claims.

Linking claim 1 is allowed. Since the restriction requirement between inventions is, as set forth in the Office action mailed on 11/30/00, was conditioned on the nonallowance of the linking claim(s), **the species restriction requirement as to the linked inventions is hereby withdrawn.** Claim 14, previously withdrawn from consideration as a result of the restriction requirement, is hereby rejoined and fully examined for patentability under 37 CFR 1.104. In view of the withdrawal of the restriction requirement as to the linked inventions, applicant(s) are advised that if any claim(s) depending from or including all the limitations of the allowable linking claim(s) be presented in a continuation or divisional application, such claims may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application. Once the restriction requirement is withdrawn, the provisions of 35 U.S.C. 121 are no longer applicable. See *In re Ziegler*, 44 F.2d 1211, 1215, 170 USPQ 129, 131-32 (CCPA 1971). See also MPEP § 804.01. Additionally, the examiner has determined that claim 23, previously withdrawn from consideration as a result of the restriction requirement of 11/30/00, more properly belonged to the elected group and is hereby rejoined and fully examined for patentability under 37 CFR 1.104.

Additional Reference of Relevance:

Sarvazyan-NA et al., *Biochemistry* 41(12858-12867)2002 disclose a method of noncellular analysis and display of 7-transmembrane receptors ( $\alpha_{2A}$ AR receptor) comprising the following steps:

- a) incorporation of an attachment tether to the receptor (HA epitope)
- b) presenting the receptor in conjunction with a support (avidin coated beads)
- c) presenting at least one ligand to bind the receptor ( $F\text{-}\alpha_{II}$ ), see line 5 of the Abstract,
- d) combining the receptor and ligand to accomplish binding while the receptor is bound to the support (see col 1 of 12860, *Flow Cytometric Analysis of Equilibrium  $F\text{-}\alpha_{II}$  Binding*)
- e) washing the bound receptor/ligand pairs (see col 1 of 12860, *Flow Cytometric Analysis of Equilibrium  $F\text{-}\alpha_{II}$  Binding*)
- f) sorting the bound receptor-ligand pairs by fluorescence and using flow cytometry to analyze the fluorescence and binding interactions in real time (see the last sentence of the Abstract and col 1 of 12860).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
